

# Media Helpline

LCMS South Dakota District media support for churches & schools

## A resource for media support

Have you ever had a technical problem and didn't know what to search for on Google? To assist you, the SD District has assembled a small team of tech and media savvy experts. With our years of knowledge and connections to other industry specialists, we can steer your church or school in the proper path for all of your media needs.

This could include:

- Consulting
- Designing
- Researching
- Purchasing
- Configuring hardware

The media's umbrella encompasses a wide range of activities. As the demand for media grows, the District Office wished to provide assistance. Video Recording, Posting Video, Streaming Video, Online Giving, Licensing, Software, Capture Devices, Cameras, Microphones, WiFi, Portable Speaker Systems, and Audio Enhancement are some of the topics that could be supported.

## Personalized Assistance

Simply send an email to [mediasupport@sddlcms.org](mailto:mediasupport@sddlcms.org). Please provide as much information as possible; images, videos, and documentation would assist us in assisting you. One of the members of the team will contact you to assess the project. The district will provide basic free consulting and ideas to you and your congregation at no cost. Depending on the project's complexity and timeline, the congregation may be able to acquire further assistance for a fee.

## Media Audit

Even if you have a setup that works, do you need a media audit on best practices? Really, email your questions! We are here to help.
